Toxicology 114 (1996) 259–260

TOXICOLOGY

Volume contents

Volume 114 (1996)

Doxorubicin- and daunorubicin-induced energy deprivation and nucleotide degradation in isolated cardiomyocytes
Increased ATP hydrolysis initiates the drug-related cell damage
R.F. Vidal, S. Eksborg, M. Sundberg, M. Carlberg, B. Elfsson, B.S. Andersson (Sweden). 1–10

Renal insufficiency induced by cisplatin in rats is ameliorated by cyclosporin A
Renal failure may be caused by mitochondrial dysfunction which can be alleviated by cyclosporine A
P.I. Campbell, I.A. Al-Nasser (Saudi Arabia). 11–17

Comparative effects of flavonoids and model inducers on drug-metabolizing enzymes in rat liver
Monooxigenases and transferases are differentially induced by flavonoids
M.-C. Canivenc-Lavier, M.-F. Vernevaut, M. Totis, M.-H. Siess, J. Magdalou, M. Suschetet (France) 19–27

The cyanobacterial toxin microcystin-LR induced DNA damage in mouse liver in vivo
The microbiol toxin causes tissue damage as measured by a number of biochemical parameters
P.V. Lakshmana Rao, R. Bhattacharya (India). 29–36

Differential effect of interleukin-1α on rat hepatic cytochrome P450 monoxygenases
An investigation on the down regulations of the hepatic P450 system
R.K. Sindhu, H. Sakai, T. Okamoto, Y. Kikkawa (USA) 37–46

Immunotoxicology

Improved ex vivo/in vitro lymph node cell proliferation assay in guinea pigs for a screening test of contact hypersensitivity of chemical compounds
The predictive value of ex-vivo/in vitro lymph node cell proliferation assay is further documented
R. Kashima, Y. Oyake, J. Okada, Y. Ikeda (Japan). 47–55

Influence of mercuric chloride on resistance to generalized infection with herpes simplex virus type 2 in mice
Mercuric chloride impairs the resistance of mice to herpes simplex virus type-2 infection
M.M. Christensen, S. Ellermann-Eriksen, J. Rungby, S.C. Mogensen (Denmark) 57–66

Increased IL-1, IL-6 and TNFα secretion and mRNA levels in WEHI-3 cells exposed to cyclopiazonic acid
The mycotoxin cyclopiazonic acid can superinduce the secretion and mRNA levels of cytokines associated with macrophage activation
M.L. Marin, S.-S. Wong, J.J. Pestka (USA) 67–79

Toxicology Information and Resources

A database designed to support dose-response analysis and risk assessment
D.J. Guth, T. S. Raymond (USA) 81–90

Bronchial responsiveness and inflammation in guinea-pigs exposed to toluene diisocyanate: a study on single and repeated exposure
Bronchioalveolar hyperresponsiveness is not causally connected with neutrophil activation
F. Gagnaire, M. Ban, J.C. Micillino, M. Lemonnier, P. Bonnet (France) 91–100

Cadmium suppresses Δ9 desaturase activity in rat hepatocytes
A study with primary rat hepatocyte cultures
N. Kudo, K. Waku (Japan). 101–111

Dose-response relationship for rat liver DNA damage caused by 1,2-dimethylhydrazine
A critical analysis of an extensive dose-response study
K.T. Kitchin, J.L. Brown (USA) 113–124
Mechanism of cadmium-induced cytotoxicity in rat hepatocytes: cadmium-induced active oxygen-related permeability changes of the plasma membrane
Cd stimulates production of intracellular hydrogen peroxide
T. Koizumi, H. Shirakura, H. Kumagai, H. Tatsumoto, K.T. Suzuki (Japan) 125–134
Relationship between mitochondrial dysfunction and toxicity of propyl gallate in isolated rat hepatocytes
Fructose protects against and azide enhances hepatocyte death caused by propyl gallate
Y. Nakagawa, P. Moldéus, G.A. Moore (Japan, Sweden) 135–145
Stimulatory effect of anesthetics on dechlorination of carbon tetrachloride in guinea-pig liver microsomes
Anesthetics studied were isoflurane, enflurane, halothane and sevoflurane
K. Fujii (Japan) 147–153

Immunotoxicology
Antibodies to myeloperoxidase in propylthiouracil-induced autoimmune disease in the cat
Cats treated with propylthiouracil develop the lupus-like syndrome and anti-myeloperoxidase antibodies
L. Waldhauser, J. Uetrecht (Canada) 155–162
Immunomodulating effects after perinatal exposure to methylmercury in mice
Perinatal exposure to methylmercury affects thymocyte development and stimulates lymphatic proliferative responses in mice
A. Thuvander, J. Sundberg, A. Oskarsson (Sweden) 163–175

Accumulation of ochratoxin A in rat kidney in vivo and in cultivated renal epithelial cells in vitro
The mycotoxin accumulates in the renal papilla and inner medulla
G. Schwerdt, K. Bauer, M. Gekle, S. Silbernagl (Germany) 177–185
Increased 5-lipoxygenase metabolism in the lungs of human subjects exposed to ozone
Alveolar macrophages are involved in leukotriene generation
M.J. Coffey, C.S. Wheeler, K.B. Gross, W.L. Eschenbacher, P.S. Sporn, M. Peters-Golden (USA) 187–197
Decreased liver type I 5′-deiodinase and increased brown adipose tissue type II 5′-deiodinase activity in 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD)-treated Long-Evans rats
TCDD has differential effects on enzymes regulating thyroid hormone levels
A. Raasmaja, M. Viluksela, K.K. Rozman (Finland) 199–205
The carcinogenicity of dichloroacetic acid in the male fischer 344 rat
F344 male rats appear to be more sensitive to the carcinogenic action of dichloroacetic acid than are B6C3F1 male mice
A.B. DeAngelo, F.B. Daniel, B.M. Most, G.R. Olson (USA) 207–221
The effect of carbon monoxide on oxygen metabolism in the brains of awake sheep
Central effects are postulated that are not related to hypoxia
P. Langston, D. Gorman, W. Runciman, R. Upton (Australia) 223–232
Characterisation of the toxic metabolite(s) of naphthalene
Quinones of l-naphthol rather than naphthalene-1,2 epoxide are the toxic metabolites
A.S. Wilson, C.D. Davis, D.P. Williams (UK), A.R. Buckpitt, M. Pirmohamed, B.K. Park (USA) 233–242

Immunotoxicology
Effects of ozone upon macrophage-interferon interactions
In vitro exposure of macrophages to ozone reduces the binding of, and responsivity to interferon-γ
M.D. Cohen, J.T. Zelikoff, Q. Qu, R.B. Schlesinger (USA) 243–252
